# THE ARCHITECTURAL ADVANTAGES

## AIA/CEU COURSE

Key-Link offers an aluminum-railing focused continuing education through [ronblank.com](http://ronblank.com). Architects and design professionals can take our class online or set up an in-person or virtual presentation with our architectural sales team. Attendees earn 1 LU | HSW upon completion.

## CODE COMPLIANCE TESTING

Key-Link and Superior railings are code compliant and backed with testing reports, which can be provided to any building officials or code inspectors who may require it. Testing is first done in-house to identify and address any concerns and then a third-party testing company conducts final testing and issues their report. Railing is code compliant from its first day in market.

## CERTIFIED POWDER COATING

To ensure quality from start to finish, Key-Link powder coats their aluminum railing in house through an extensive process that includes a pre-wash, drying, coating, baking, and curing. Key-Link's process and coating have earned them PCI-4000 certification from the Powder Coating Institute, a third-party organization that verifies that companies have both the facilities and capability to meet industry standards.

Key-Link's AAMA 2604 standard powder coating provides essential weather protection for aluminum railing. AAMA 2605 standard coating is part of our coastal upgrade package and ensures long-lasting protection in the presence of saltwater.

# PROJECT ESTIMATING TAKE OFF SERVICE

The Key-Link and Superior architectural support team is here to help if you need assistance with project estimating, takeoffs, or anything else related to custom residential, commercial, or multi-family projects.

To take advantage of this service, please provide us with:

- Due Date
- Location of Project
- Style and Height of Railing
- Plans or Drawings
- Contact Information
- Any Additional Relevant Information

# DESIGN ASSIST

## BIM Object - REVIT Files

Key-Link is soon to release an extensive collection of REVIT files on BIMObject.com. We are excited to provide this tool for your use. An announcement will be made once we go live.

## ARCAT

ARCAT provides architects and design professionals with design tools to help spec Key-Link and Superior products. Both Key-Link aluminum and Superior vinyl products can be found on the site, along with helpful resources, marketing material, and more. [arcat.com](https://www.arcat.com)

## PRODUCT DRAWINGS

Key-Link and Superior can supply product drawings of railing and fencing sections, posts, and brackets to assist with project planning. Drawings are uploaded to ARCAT. Additionally, project specific shop drawings can be requested from the Key-Link and Superior architectural team.

## 3-PART SPECIFICATIONS

These specifications for design professionals are also available through ARCAT.

## INSTALLATION

In addition to our always-available installation videos, the Key-Link and Superior team consists of technical specialists who are always ready to take a call, video chat, or, if necessary for a large or complex project, appear in person to work alongside contractors to help them understand proper installation.
